COMPANY MISSION AND HISTORY

4Tests.com was started in 1999 by two recent college graduates. While they were preparing for their Microsoft Certifications they quickly realized that there were very few resources available on the internet. This inspired them to begin researching what areas of opportunity were still available on the web, and 4Tests.com was born.

Since its inception, 4Tests has grown to provide millions of users assistance in preparing for their upcoming exam. In addition to the growth in traffic, 4Tests has continued to expand its available market by incorporating many new age groups.

Now, 4Tests.com exists to serve the education and testing markets, which include high school students, college students, and professionals eagerly seeking to prepare for exams. Our easy-to-use advanced web technology immediately helps our users by providing sample tests and recognized resources allowing them to better prepare for their exam.

Furthermore, it is crucial to 4Tests that everyone of our users are truly satisfied by getting real use from our site every time they visit. We constantly strive to encourage our users to provide feedback whenever they feel this goal has not been met and we constantly review their comments as we continue to expand our services.

We look forward to working with you,

Marc Weinstein

Pronouns

[Start Over](#) 2 Total Pages [Next Page](#)

Pronouns

Pronouns usually refer to other words, called their **antecedents** because they (should) come before the pronoun. A pronoun's antecedent may be either a noun or another pronoun, but in either case, it *must* be clear what the antecedent is. Consider this example:

Micheline told Ruth that **she** would take Jerry to the barn dance.

It is not clear whether the pronoun "she" in this sentence refers to Ruth or Micheline. Unless pronouns refer unmistakably to distinct, close, and single antecedents, the reader will never be sure who's going to the square dance with whom.

A PRONOUN SHOULD HAVE ONLY ONE POSSIBLE ANTECEDENT

If there is more than one possible antecedent for a personal pronoun in a sentence, make sure that the pronoun refers only to one of them:

[WRONG] Jerry found a gun in the knickers **which** he wore.
Which he wore could modify "knickers" or "gun."

[WRONG] Jerry called Steve twelve times while **he** was in Reno.
